Education

Ho Chi Minh City University of Technology — TP.HCM, VietNam

Bachelor of Software Engineering — **Fall 2023 - Spring 2027**

Relevant Coursework: Related courses: Fundamentals of Programming → Object-Oriented Programming → Databases → Web Programming → Systems Analysis and Design → Software Engineering → Software Testing.

Experience

Smart Exam Proctoring System — github.com/Doancoso AI & Computer Vision Developer — Spring 2026 - Present Targeted towards

Ensuring academic integrity in online education platforms. Written in Python using PyTorch, Ultralytics YOLOv11, OpenCV, and FastAPI.

- Architected and engineered an automated real-time video monitoring pipeline utilizing YOLOv11 to detect unauthorized objects and secondary persons during online examinations.
- Processed and structured large-scale video frame datasets, optimizing image extraction and annotation workflows to fine-tune object detection models for high accuracy.
- Designed and implemented a scalable backend API using FastAPI to handle concurrent video stream processing, drastically reducing latency for cheat detection alerts.

Projects

3D Interactive Portfolio Website

Creator and Sole Developer — **October 2026**

Designed, engineered, and deployed this portfolio website from scratch using React, Three.js and AWS. Enjoy the unique and immersive 90s inspired experience by visiting

TRUONGVU — truongvu05th01.netlify.app

Full-Stack Developer — **October 2026**

Welcome! truongvu05th01.netlify.app is an interactive 3D retro-OS portfolio. It showcases my entire journey—from Full-Stack and AI/Computer Vision projects at HUTECH to a dedicated space for my music.

Skills

Language Proficiency

Python • Typescript • JavaScript • Java • C++ • C • C# • SQL • Haskell • HTML5 • CSS3 • PHP

Web Development & Frameworks

React.js • React Native • Three.js • Redux • Node • Express • Jest • Framer • React Navigation
